

I just learned, when listening to the state broadcaster RTV, that the number of homeless people in our capital Bratislava, has reached the astonishing number of 4000 people, in a city with a population of just **500 000**.

*"V Bratislave žije na ulici už **4000** bezdomovcov."*

I decided to flash this alarm signal into the world with the explicit purpose to bring necessary attention to the issue, and help halting the hidden eugenicist agenda of our "elites", of these **facist monsters**, who aim to reduce "weaker elements" in society slowly but steadily.

They don't hesitate to spend billions of euros on building motorways (our minister of infrastructure just bragged about it, see

[here](#)

), but the

they are

**unwilling**

to find a million euros to solve the problem of homelessness in the capital.

**There**

**are people d**

**ying on the streets in Bratislava, as local councils and charities are unable to cope with such a number of homeless people!**

**Minister of social affairs Jan Richter, who in order to make a big problem even bigger, has reduced, in December 2013, the amount of state benefits these people can receive, to just 61 EUR per month. They are even required to work for it for 32 hours, else they do not receive even an euro cent from the state!**

*"n rok na finan n  pomoc od  t tu vo v y ke **61,60 eura** len vtedy, ak odpracuj  **32** hod n mesa ne"*

They are rather welcome to drop dead on the streets and parks of the capital. They are seen just everywhere, even the parks of the suburbs are filled with them. **Our minister of social affairs:**

**And hopefully, one day, it will end like a pig!**
